

NWSPCT™ Fruit Tray Mat

Product Overview

This tray mat is a disposable food - contact pad specially designed for fresh blueberry, cherry, grapes and other small size fruits with skin. It can effectively absorb the moisture generated during the storage and transportation of fresh fruits and prevent moisture accumulation from causing contamination, and maintain the cleanliness of packaging and display equipment. It is widely used in butcher shops, grocery stores, food distribution centers and other high - volume business scenarios.

Product Category

Code	Absorption	Pattern	Color
FV55	>500%	Leaf	White or tailor made
FV64	>600%	Leaf	White or tailor made
FV73	>700%	Leaf	White or tailor made

Features & Advantage:

- Increased Wet Strength: the special structure design imparts the strength increase more than 30% in wet condition, which is a big improve point comparing the traditional tissue;
- Excellent Moisture Retaining Properties: It is made of the PP microfiber and wood pulp, which has higher water retaining property than the typical mat without microfiber fiber in the market;
- Durable and Stable: The 65GM weight design ensures the structural integrity of the mat during use, in case the 65gsm material could not meet the requirements, other basis weight is also available.

Certificates & Regularity:

- GB/T 4806.7-2023;
- BRC

Usage Method:

1. Take out one piece of mat;
2. Check if it is free of pollution;
3. Flatly lay the mat at the bottom of the tray, and then place fruits on the mat;
4. Complete the subsequent packaging operations such as wrapping with stretch film film, and then store or transport.

Notes & Disposal:

- It is disposable and it shall not be reused;
- It is only used for food package moisture absorption, and shall not be eaten;
- this product is not compostable; it shall be disposed according to the general domestic waste.
- Store in a dry and ventilated environment, avoid dampness, and prevent the reduction of water absorption performance. Once the individual package is open, please use it up as soon as possible.

NWSPCT™ 果蔬托盘垫

产品概述

这款托盘衬垫是一款专为新鲜蓝莓、樱桃、葡萄等带表皮的小型水果设计的一次性食品接触级吸液垫。它能有效吸收新鲜水果在储存和运输过程中产生的水分，防止因水分堆积造成污染，同时保持包装及展示器具的洁净外观。该产品广泛应用于肉铺、杂货店、食品配送中心等大流量商业场景。

产品类别

代码	吸液能力	外观花型	颜色
FV55	>500%	树叶	白色或定制的颜色
FV64	>600%	树叶	白色或定制的颜色
FV73	>700%	树叶	白色或定制的颜色

特性&优势:

- **高湿强度:** 特殊的结构设计使其湿态强度比干态强度提升超30%，相较于传统吸液纸是一项重大改进；
- **优异的锁水性能:** 采用聚丙烯超细纤维与木浆材质制成，相比市面上无超细纤维成份的常规衬垫，具备更强的保水能力；
- **耐用且形态稳定:** 65克/平方米的常规基重设计保障了衬垫在使用过程中的结构完整性，如果有更进一步的要求，其它基重也可以试用和验证。

使用方法:

1. 取出1片衬垫；
2. 检查衬垫是否无污染；
3. 将衬垫平铺于托盘底部，再将水果放置在衬垫上；
4. 完成缠绕拉伸膜等后续包装操作后，即可进行储存或运输。

注意事项及处理方式:

- 本产品为一次性用品，不可重复使用；
- 仅用于食品包装防潮吸水，严禁食用；
- 本产品不可堆肥，需按一般生活垃圾进行处理；
- 需存放于干燥通风环境，避免受潮，防止吸水性能下降。单包的产品一旦打开包装，请尽快使用完。

认证&标准:

- GB/T 4806.7-2023;
- BRC
